Education

Nirma University, Institute of Technology — **Ahmedabad, India**
B.Tech in Computer Science and Engineering (CSE), ***CGPA: 8.07/10*** *(through 6th semester)* — *Jun 2027 (expected)*

Experience

Ethics Infotech LLP — **Vadodara, India**
MERN Stack Developer — *May 2026 - Jun 2026*

- Developed **25+ RESTful API endpoints** in Node.js and Express.js for the MagBrainAI conversational agent platform, serving AI model inference with **<200 ms** average response time.
- Built React.js frontend with **5+ core features** (chat UI, conversation history, authentication); **30%** better UI response time.
- Optimized MongoDB queries (**40%** lower query time); added caching for **50%** performance gain in AI inference pipeline.

Nirma University — **Ahmedabad, India**
Technical Lead - Computer Society of India (CSI), Data Science and Cyber Security (CSC) Clubs — *Sep 2024 - Apr 2026*

- Coordinated HackNUThon25 for CSI with **1500+ participants** across **10 colleges** and **$15K+** in sponsorships; managed end-to-end event logistics and technical execution.
- Organized **18 technical workshops** (Python, Machine Learning, Cybersecurity) for the Data Science and Cyber Security clubs; mentored **50+ students** and increased club engagement by **40%**.

Projects

AI-Driven Vulnerability Detection (MLOps, Security) — **GitHub**
Stack: Python, TensorFlow, OpenVAS, Scikit-learn, REST APIs, Docker

- Architected a DevSecOps pipeline combining OpenVAS scanner and TensorFlow CNN on **10K+ CVSS metrics** for automated threat classification; achieved **40% false positive reduction** vs. rule-based approaches.
- Containerized the microservice workflow with Docker; enabled real-time vulnerability scanning, automated reporting, sub-second latency, and **99%** detection accuracy.

Campus Records Manager (Full-Stack, Java) — **GitHub**
Stack: Java, MySQL, Swing GUI, JDBC

- Engineered a full-stack platform (Swing GUI + MySQL) for **500+ users**; designed a 3NF relational schema and CRUD operations with **35% query optimization** via indexing (**<200 ms** response time).
- Implemented RBAC, encrypted credential storage, and automated audit logging for administrative compliance.

Cloud Infrastructure Simulator (System Design, React) — **GitHub**
Stack: React 19, TypeScript, Node.js, WebSockets; event-driven architecture, containerized deployment

- Built a real-time simulator for cloud workloads and failure injection in React 19 + TypeScript; modeled dynamic load balancing, auto-scaling, and fault tolerance across **10+ failure modes**.
- Achieved **50 ms latency** and **99.5% uptime**, validating resilience under **100K+ concurrent requests** via DDoS simulation.

Skills

Languages: Java, JavaScript, TypeScript, Python, C++, C, SQL

Full-Stack Development: MERN Stack, React.js, Node.js, Express.js, FastAPI, REST APIs, WebSockets

Machine Learning (ML): Deep Learning, TensorFlow, Scikit-learn

Security: DevSecOps, Cybersecurity, OpenVAS, Role-Based Access Control (RBAC)

Databases: MongoDB, MySQL, JDBC, 3NF Schema Design, Query Optimization

Tools: Docker, Git, Linux, API Development, CRUD, Performance Tuning

Core CS: Data Structures and Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Computer Networks, Object-Oriented Programming (OOP), System Design

Certifications and Achievements

- **Oracle Certifications:** AI Foundation, Generative AI, Data Science
- **LeetCode:** 300+ problems solved; top 15% globally; 50-day and 100-day coding streak badges.
- **YouTube (Edukoo):** Built a channel with **1,000+ subscribers** focused on AI tools and video editing.
- **Swimming:** 5th in State Swimming; 4-time District Champion.
